

Orders in Diplomacy

1. Hold

Not much of an order.

Example:

A Paris hold

2. Move

Pretty basic.

Example:

A Paris → Burgundy

3. Support a unit in place

Supporting unit must have ability to move to the supported unit's province. The supported unit can itself hold, support or convoy, as long as it stays in place.

Example:

A Burgundy hold

A Paris **S** A Burgundy

4. Support a unit moving

Supporting unit must have ability to move to the supported unit's *target* province.

Example:

A Munich → Burgundy

A Paris **S** A Munich → Burgundy

5. Convoy an army moving

The fleet must be ordered to convoy the army, and the army must be ordered to make the move. The fleet must be in a water province (not Denmark or Constantinople). A chain of adjacent fleets may be used.

Example:

A Norway → Brest

F North Sea **C** A Norway → Brest

F English Channel **C** A Norway → Brest
